OSINT (Open Source Intelligence)

recap

Successful Kali/Git setup?

OSINT Handbook

Ethics Writeup

- - -

Questions?

announcements

Majority of submissions received via ELMS

Make sure to push your HW to your github, too

We are pulling the repos at 11:59 PM deadline day

Any questions from last week?

kali

Demo

(tools, usage, wordlists, etc)

passive intelligence gathering

- OSINT: Open-Source Intelligence
 - Collection
 - Exploitation
 - Dissemination

of publicly available information for a particular intelligence requirement.

Open Source Intel Does Damage!

- The average financial cost of a data breach is \$3.86m (IBM)
- Phishing accounts for 90% of data breaches
- 15% of people successfully phished will be targeted at least one more time within the year
- Phishing attempts have grown 65% in the last year
- Around 1.5m new phishing sites are created each month (Webroot)
- 76% of businesses reported being a victim of a phishing attack in the last year
- 30% of phishing messages get opened by targeted users (Verizon)

OSINT

- Tailored searches (ie. dorks, etc.)
- Web services (ie. Bazzell's OSINT techniques, centralops, Shodan/Censys, Google, WayBack, Facebook, etc.)
- CLI (ie. whois, nmap, theharvester, etc.)

Active vs. Passive Recon

<u>Passive Recon</u> - An attempt to gain information about targeted computers and networks without actively engaging with the systems, and can avoid detection.

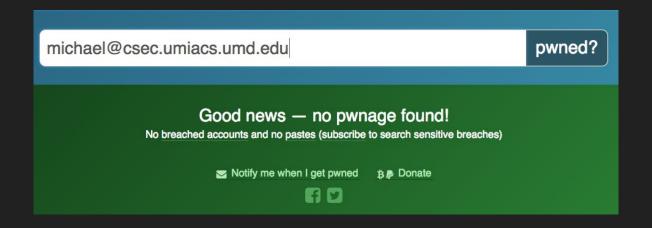

Active Recon - the attacker engages with the target system, typically conducting a port scan to find any open ports.

Example: pastebin.com

- Most popular paste site on the web
 - o https://pastebin.com
- ... or search across multiple paste sites:
 - https://inteltechniques.com/osint/menu.paste bins.html
- https://twitter.com/PastebinLeaks (old)

Example: haveibeenpwned.com

- "Check if you have an account that has been compromised in a data breach"
 - https://haveibeenpwned.com

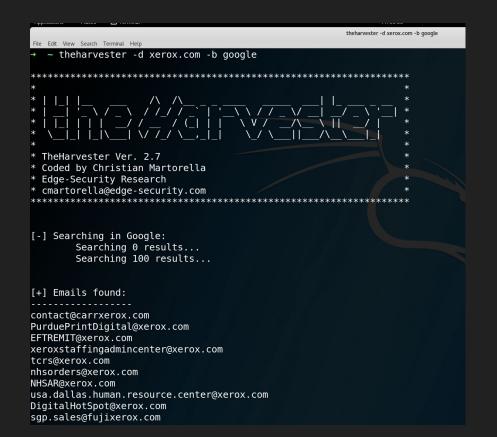

Example: nmap

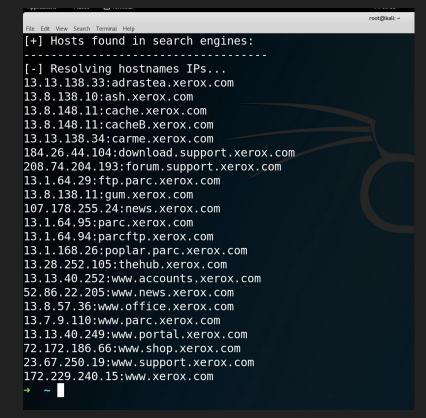

- Port scanner
 - Displays services/OS/etc... of an IP address(es)
 - https://en.wikipedia.org/wiki/List_of_TCP_an
 d UDP port numbers
- Very noisy
 - The network admin will see you nmap'ing them

Example: shodan & censys

- Search the Internet for devices
 - o https://www.shodan.io
 - o https://censys.io
- What if...
 - http://www.defaultpassword.com

Example: theharvester

Example: discover

- Automated OSINT scripts
 - Follow installation instructions
 - https://github.com/leebaird/discover

By Lee Baird

RECON

- 1. Domain
- 2. Person
- Parse salesforce

SCANNING

- Generate target list
- 5. CIDR
- 6. List
- 7. IP, Range or URL

WEB

- 8. Open multiple tabs in Firefox
- 9. Nikto
- 10. SSL

HISC

- 11. Crack WiFi
- 12. Parse XML
- 13. Generate a malicious payload
- 14. Start a Metasploit listener
- 15. Update

Example: wayback machine

- View the historical changes of a website
 - https://archive.org/web

Example: IntelTechniques

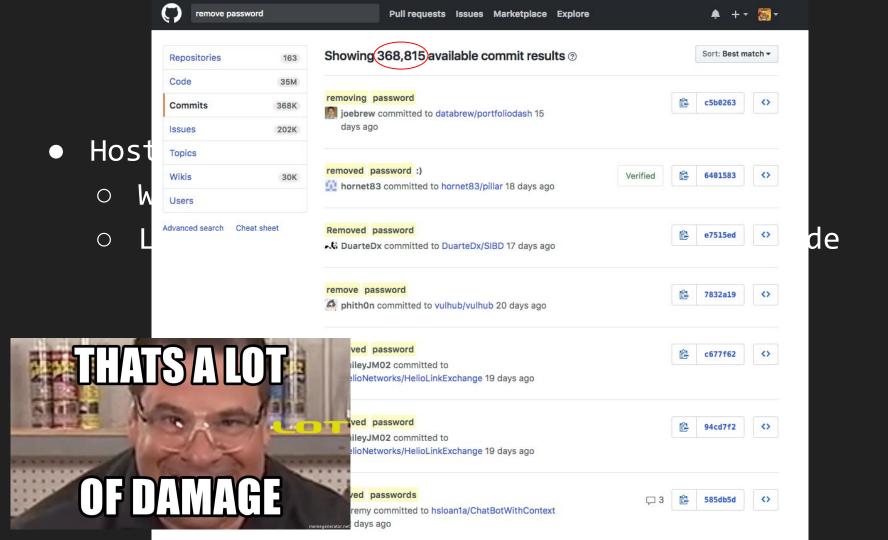

https://inteltechniques.com/

https://inteltechniques.com/bus
cador/ (VM)

IntelTechniques Custom Search Tools
Search Engines
Facebook
Twitter
Periscope

Example: OSINT Framework

http://osintframework.com

note

- We have not presented an exhaustive list of OSINT techniques and tools
- But the community is constantly growing
 - o https://github.com/jivoi/awesome-osint

your turn

ejnorman84

(hints)

You will know you are on the right track if...

- 1. you find link(s) to the UMD Cybersecurity Club
 or UMD
- 2. you find link(s) between username(s), email
 address(es) and IP address(es)
- 3. you find code/encryption keys/forum posts/etc
- 4. only one flag: CMSC389R-{}

There may be easter eggs... Flag format: *CMSC389R-{}

how to solve

Acceptable solution: find an email and an IP address...

Come up to the front when you and your teammate(s) have found both pieces of information

homework #2

Will be posted tonight.

Let us know if you have any questions!

This assignment has two parts.

It is due by 9/13 at 11:59 PM.
